DISCLAIMER
As at its date of issue, this document, in whole or in part, is subject to consideration by the IMO organ to which it has been submitted. Accordingly, its contents are subject to approval and amendment of a substantive and drafting nature, which may be agreed after that date.

ROUTEING MEASURES AND SHIP REPORTING SYSTEMS

Preliminary assessment of proposals on ships' routeing and ship reporting systems*

Note by the Chair

1 The preliminary assessments of the ships' routeing and ship reporting system proposals submitted for consideration at NCSR 12 are set out in annexes 1 and 2, respectively.

Action requested of the Sub-Committee

2 The Sub-Committee is invited to note the information provided and take it into account during the consideration of the ships' routeing and ship reporting system proposals submitted at NCSR 12.

***

* Procedural background provided in document NAV 51/19, paragraph 3.4.

ANNEX 1

TRAFFIC SEPARATION SCHEMES AND ROUTEING MEASURES OTHER THAN TRAFFIC SEPARATION SCHEMES

Adherence to the requirements is marked as "✓", while sections in an unclear or questionable state are marked as "U", with explanatory notes provided in footnotes as necessary.

	Summary						Description of the Area			Cooperation between States	Traffic considerations						Marine environmental considerations		Mandatory routeing systems			Position-fixing	Miscellaneous information				Standard format	Other guidance "U" only, if observed	
Document/ proponent	Objectives	Demonstrated need	Reason for proposal preferred	History of incidents	Applicability	Impact on shipping	Location (positions)	Reference chart details	Chartlet (appropriate one)	Cooperation between States	Following existing traffic patterns	Aids to navigation	Information on traffic patterns	Hydrographic surveys and charts (adequacy)	Alternative measure	Offshore structures	Environmental factors	Prevent/reduce risk	Sufficient justification	Adverse effect to ports and harbours (inc. TSS)	Limited to what is essential	Aids or services	Fishing ground, activities, and foreseeable changes in the traffic pattern	Other measures taken	Consultations with mariners and other users	Monitoring compliance and actions taken (inc. TSS)	Correct format for description of proposed system (GPSR)	Adherence to other guidelines than GPSR & MSC.1/Circ.1060	Remarks
NCSR 12/3/1 (France)	U[1]	✓	✓	U[2]	U[3]	✓	U[4]	U[5]	✓	U[6]	N/A	U[7]	✓	U[8]	U[9]	✓	✓	U[10]	N/A	N/A	N/A	U[11]	✓	✓	✓	N/A	U[12]	-	Creation of an area to be avoided off the coast of Reunion

***

1 Additional information may be required to clarify the objective and needs including the analysis leading to an (non-mandatory) ATBA only.

2 Annex 2 provides records of incidents. Additional information may be required on types and sizes of vessels; including distinction between SOLAS and NON-SOLAS.

3 Additional information may be required to clarify exemptions for ships making a stopover in ports. The meaning of "authorized activity" may also require clarifications, including the entity which authorizes the activity.

4 The description of the curve line in the definition of the ATBA where the arc is used surrounding the outer limit of the territorial sea is not clear.

5 Edition and year information not provided.

6 Given that the area concerned is a part of a trans-oceanic passage route, the design of routeing systems should be developed taking into consideration the impact on other measures implemented by other States in the same region (see SOLAS regulation V/10.5).

7 The reason for not providing non-physical AtoN may require further elaboration.

8 Not provided.

9 Given the size of the proposed ATBA, consideration of other alternative measures, such as combinations of small ATBAs and recommended routes, could be explored.

10 The possible concentration of traffic just outside the ATBA, with a consequential increased risk of collisions, should be examined.

11 Availability of services other than GNSS, including the utilization of virtual AtoN, is not clear.

12 Incorrect symbol of the ATBA boundary used in the chart.

ANNEX 2

SHIP REPORTING SYSTEMS

Document	Objectives	Demonstrated need	Categories of ships	Traffic characteristics/ Environment aspects	Geographical coverage	Appropriate chartlet	Content essential for achieving objectives	Report timing	Information to be provided to ships; procedures	Communication requirements	Rules and regs. in force	Shore-based facilities	Existing measures; why inadequate	Backup procedures	Emergency Plan	Measures for non-compliance	Implementation date	Correct reporting format	Reference to relevant data exchange standard	Cyber-risk management guidelines	Automated ship reporting by electronic means	Adherence to res A.851(20)	Draft text for resolution	Adherence to other applicable Guidelines	Remarks
NCSR 12/3 (Albania et al.)	U[1]	✓	U[2]	U[3]	✓	✓[4]	U[5]	✓	U[6]	U[7]	U[8]	✓	U[9]	✓	✓	✓	✓	U[10]	✓[11]	✓	U[12]	U[13]	✓	U[14]	Amendment of existing mandatory ship reporting system in the Adriatic Sea (ADRIREP)

1 Additional information may be required to clarify the objective and needs.

2 A new category is added for large ships requiring reporting and the size exemption for smaller ships is proposed to be cancelled. Additional justification for this proposed expansion may be required.

3 Traffic characteristics not provided.

4 Additional information may be required to indicate which authority should be reported. Ten different authorities from five coastal States are listed without their delineations, with the exception of crossing the southern area limit.

5 Noting that more categories of ships would be required to report, justification provided for some of the items for inclusion in the reporting may not be sufficient.

6 Not clearly provided. The proposed new section 4 of the system does not address information to be provided to ships.

7 While it is stated that using the electronic reporting by SafeSeaNet is the requirement, it also states that IMO Standard Marine Communications Phrases shall be used, which may be confusing.

8 Additional information on the relationship between the existing TSSs *In the Adriatic Sea* and ADRIREP may be required.

9 Stated inadequacies may be addressed by shore-based facilities upgrades.

10 Abbreviations are not in conformity with resolution A.851(20), which stipulates FR for final report. However, the proposal uses ER for the final report and FR for the first report, which contradicts.

11 Additional information on relevant data exchange standards may be desirable.

12 Given the availability of information by automated means by ships, continued reporting requirements for most of the items made mandatory in 2002 are still required to be reported despite the new criteria introduced by resolution MSC.433(98). Analysis on each item to be retained for reporting would be necessary.

13 Contents of the report may not be limited to essential information to achieve the stated objective.

14 The amendments propose the use of the system called SafeSeaNet. Additional consideration may be required given the guidance in resolution MSC.433(98), which encourages Governments to consider automated electronic reporting means recognized by the Organization when reviewing their ship reporting systems.

Document	Objectives	Demonstrated need	Categories of ships	Traffic characteristics/ Environment aspects	Geographical coverage	Appropriate chartlet	Content essential for achieving objectives	Report timing	Information to be provided to ships; procedures	Communication requirements	Rules and regs. in force	Shore-based facilities	Existing measures; why inadequate	Backup procedures	Emergency Plan	Measures for non-compliance	Implementation date	Correct reporting format	Reference to relevant data exchange standard	Cyber-risk management guidelines	Automated ship reporting by electronic means	Adherence to res A.851(20)	Draft text for resolution	Adherence to other applicable Guidelines	Remarks
NCSR 12/3/3 (Austria et al.)	✓	U[15]	N/A	N/A	N/A	N/A	U[16]	U[17]	U[18]	U[19]	N/A	N/A	✓	N/A	N/A	U[20]	✓	U[21]	✓	U[22]	✓[23]	✓	✓[24]	✓	Amendments to existing mandatory ship reporting systems in and around the coasts of European coastal States

15 Additional information about how the proposed amendments relate to the objectives of the reporting systems may be required.

16 The reporting systems proposed to be amended may have different objectives. The new proposed requirements should align with the objectives of each reporting system.

17 It is not clear when the relevant certificates, as required by new designator X, would need to be sent in a PDF format by email.

18 The proposed procedure does not specify when the information should be submitted. Email addresses are not specified.

19 The document explains that ships not having internet connection may be requested to send their insurance certificates by other means available. This may also need to be included as part of the proposed amendments.

20 Not provided.

21 Some of the existing reporting systems proposed to be amended have no designator X, which cannot be amended. Suitability of emailing a PDF file as a reporting format should be confirmed for the purpose of the reporting system.

22 Not provided.

23 Although the proposed reporting is in electronic format, it will still require human intervention.

24 Given the variations of each system to be amended, preparing separate amendments for each system to be amended will be required.
